

## Part 102 Compliance Matrix

The Rule references in this compliance matrix have been extracted from the Civil Aviation Rules system as the minimum compliance requirements for an applicant for the issue or renewal of a Part 102 Unmanned Aircraft Operator Certificate.

A completed compliance matrix must be submitted by the applicant for both initial certification and for renewal. Additionally, the certificate holder should maintain an up-to-date compliance matrix to assist with on-going compliance and to support certificate amendment requests.

The purpose of the matrix is to speed up the certification process, ensure every applicable rule requirement has been addressed in the exposition and reduce the cost of certification by the quick location of required policies or procedures in the applicant's exposition manual suite.

**Please note** that Part 102.21(a)(1) requires an applicant for Part 102 certification to also comply with the relevant parts of Part 101. Therefore a Part 101 matrix will also be required to accompany the Part 102 application.

**All rules have to be complied with**, but not every rule has to be addressed in the exposition. At least the following Rules must be included unless they are not applicable to the operation, in which case they should be annotated N/A. The intention of this matrix is to assist rather than instruct the applicant in an initial application or request for renewal. If, for your operation, compliance is required with a rule not listed in the matrix, please add it to the matrix list in the space provided at the end of the matrix and identify the exposition reference.

This matrix needs to be completed by every applicant for a Part 102 Unmanned Aircraft Operator Certificate and show the exposition pages and paragraph numbers that satisfy the rules in the *Manual References / Applicant's Comments* column. Where the applicant does not meet the rule requirement or deems it not applicable, an explanation should be given in this column.

Please note ticks (✓) are **not** acceptable.

The completed matrix should accompany the exposition documents and preferably be included as a component of the exposition. The applicant may submit a completed matrix in a different format as long as it includes all the rule references identified below; however, there may be additional processing time required by the CAA in cross-referencing requirements.

### General Manual Layout and Distribution

Manual binder: Can the manual be amended easily? (Three- or four-ring binders are preferred: two-ring binders are not recommended as the pages are too easily torn). If permanently bound, do you intend to re-issue at every amendment? This may inhibit frequency of needed amendments.

The exposition shall have page numbering and date of issue on each page. The List of Effective Pages (LEP) is the main control document for exposition content. As you need to identify specific sections of the exposition to show compliance against each required clause of the rule, paragraphs should be numbered and related to each section.

Electronic exposition: Is the matrix included as part of the file(s)/disc? If so, is it up to date? Have you considered the methods for distributing to the CAA and how you will manage amendments?

persons or property; and		
102.11(b)(11) procedures for handling cargo or dropping items, if such operations are intended; and	Not applicable	
102.11(b)(12) initial airworthiness standards that must be met; and	See MFNZ Large Model Code of Practice	
102.11(b)(13) procedures for controlling, amending and distributing the exposition; and	See MFNZ Large Model Code of Practice	
102.11(b)(14) any other approvals that are required to conduct the proposed operation.	See MFNZ Large Model Code of Practice	
<b>102.23 Changes to exposition</b>		
102.23(a) Each holder of an unmanned aircraft operator certificate must—		
102.23(a)(1) ensure that the exposition is amended—		
102.23(a)(1)(i) so that it remains a current description of the certificate holder's operation; and	See attached exposition	
102.23(a)(1)(ii) to ensure continued compliance with any Civil Aviation Rules that have been adopted under rule 102.11(c); and	See attached exposition	
102.23(a)(2) provide the Director with a copy of each amendment to the exposition as soon as practicable after the	See attached exposition	

Rule reference	Manual References / Applicant's Comments	CAA Review and Comments (for CAA use only)
amendment is incorporated into the exposition; and		
102.23(a)(3) make such amendments to the exposition as the Director considers necessary in the interests of aviation safety	Agreed	
102.23(b) If a holder of an unmanned aircraft operator certificate proposes to change any of the following, prior acceptance by the Director is required:	Agreed	
102.23(b)(1) the identification of any person who is to have or is likely to have control over the exercise of the privileges under the certificate:	See attached exposition	
102.23(b)(2) the identification of locations from which the certificate holder conducts unmanned aircraft operations	See attached exposition
